The Ledmodea LM-GA2 offers the best solution for projects requiring a large amount of scenes along with an uncluttered and intuitive interface.

The computer programmable Ledmodea LM-GA2 is capable of playing up to 99 scenes, each of which can be modified by touching the mode button to change the dimmer and color. The LED display of the Ledmodea LM-GA2 makes it easy to tell which scene number is playing. The wall panel is slightly taller than the Ledmodea LM-GU2 allowing it to be mounted onto any single gang wall socket around the world.
